

Over 3,000 pounds of boneless beef chuck meat recalled over possible E. coli contamination.

- If you currently have or are looking to purchase ground beef please check the establishment number inside the USDA mark of inspection. If it is EST. M-19549 throw out or return to the place of purchase.

- Those who contracted illness from the effected meat felt symptoms of diarrhea and vomiting within 2-9 days of eating the contaminated meat. Please reach out to a medical professional if you experience any of these symptoms after consuming ground beef.

For more information please visit the Food Safety and Inspections [FSIS] website.
